

Project Design Phase-II

Customer Journey Map

Date	17 October 2022
Team ID	PNT2022TMID01612
Team Leader	Ms.Shalini N S(7376191CS283)
Team Member	Ms.Subasri S(7376191CS304), Ms.Sneha S(7376191CS294),Ms.Nisalya (7376191CS230)
Project Name	Virtual eye – lifeguard for swimming pools for active drowning
Maximum Marks	

1 Phases High-level steps your user needs to accomplish from start to finish	<div>to detect the problem</div>	<div>finding an appropriate sensor to the problem</div>	<div>what we need to implement</div>	<div>How to implement creatively</div>
2 Steps Detailed actions your user has to perform	<div>Detect the Pulse rate from pulse rate sensor</div> <div>To detect the pulse rate of person using sensor</div> <div>To find over pulse rate of swimmer</div>	<div>To find drowning person</div> <div>By pulse rate</div> <div>By sensor</div>	<div>Pulse rate detection</div>	<div>To detect Pulse rate Of swimmer</div> <div>Using deep learning algorithm</div> <div>It detect pulse rate in digital watch</div>
3 Feelings What your user might be thinking and feeling at the moment	<div>Easy for the LifeGuard to save people life</div> <div>Low death</div> <div>Earlier prediction can be possible</div> <div>It's difficult to know if the sensors are not working unexpectedly</div>	<div>Earlier prediction to save life of a swimmer</div> <div>Lifeguard can save most of the life</div> <div>Saving life of every individual</div> <div>Life can be saved because of earlier predict</div>	<div>Should be alert all time</div> <div>The model helps to predict about Pulse rate of swimmer</div> <div>Lifeguard should be ready and alert all time is difficult task</div> <div>It requires an unlimited or continuous internet connection</div> <div>Sometimes sensor may fail to work</div>	<div>Instanten "it the good sensor</div> <div>Real-Time Pulse rate Monitoring</div> <div>Continuous monitoring</div> <div>They need maintenance For proper functioning</div> <div>Always Lifeguard should be available</div> <div>proper prediction is needed</div>
4 Pain points Problems your user runs into	<div>Due to network issues the alarm message will be delivered lately</div> <div>If the program is not properly instered in the device then the device may not to be work</div>	<div>Some times cant find correct drowning person</div> <div>It is because of 3 or more number of drowning happens</div> <div>There is a chance of losing pulse rate of swimmer</div>	<div>Lifeguard should know little about Normal pulse rate</div> <div>communication between Lifeguard and swimmer</div> <div>It can reduce the drowning accident</div>	<div>Cannot save everyone life</div> <div>No measures are taken due to some external cases</div> <div>Lifeguard cannot save life of swimmer if a sensor takes more time to sense</div>
5 Opportunities Potential improvements or enhancements to the experience	<div>Pulse rate is detected automatically</div> <div>Pulse rate can detected using the deep learning algorithm</div>	<div>It provides information quickly and accurately</div> <div>It can be used to monitor pulse rate of swimmer, to Detect drowning</div> <div>Becomes handy to save swimmer Life earlier</div>	<div>high quality of sensor is needed</div> <div>Saves the more people rate</div> <div>Makes lower death</div>	<div>Accurate prediction is needed</div> <div>It reduces the swimmer death</div> <div>Saves lot of swimmer life</div>
